MODULAR SOLID SURFACING

White bowl and half solid surface undermount sink in Glacier Worksurface

## BE INSPIRED BY SOLID SURFACE

There's little that speaks the language of worktop chic quite like solid surfacing does. It's the material that brings together designer looks, unrivalled aesthetics and everyday practicality. The Encore range has been shaped to satisfy your design aspirations.

New to the collection are stylish white acrylic sinks which can be seamlessly moulded into your choice of worksurface for the ultimate in streamlined looks. An advantage of Encore acrylic sinks is that they are reinforced and so suitable for use with waste disposal units. A single bowl and a bowl and half option are available. The bowl and a half sink can be installed in to a 600mm base unit offering superb flexibility and ideal for where space is at a premium.

Added to that there are the new classic Crystal designs featuring large scale opaque chips bringing a wonderful lustre and depth to the surface; guaranteed to make an enviable style statement in your home.

DESIRABLE AND LUXURIOUS

Run your fingers along the silky smooth surface and you will appreciate the seamless beauty that only solid surfacing can achieve. Let your eye take in the subtle metallic particles that delicately catch the light and give the material a truly stunning appeal.

This is the feeling of sheer luxury. Cool, sophisticated and uncompromisingly elegant in any kitchen setting. With Encore you have real design freedom to create your perfect sink space. Be as individual as you want to be. Encore offers the flexibility for shaped corners, radius ends and island units, bringing style and movement to your kitchen design.

The material works beautifully with undermount sinks offering the visual appeal of simple, free-flowing lines.

Encore is compatible with the Zendo or Etrouduo one and a half bowl stainless steel undermount from our exciting range by The 1810 Company (see pages 30-33), with jigs available for on-site installation.

Please refer to page 46-47 for more product information.
