Cleaning instructions for PERGO® floors in residential areas

One of the many advantages with floors from PERGO is that they are easy to keep clean and beautiful. To make the cleaning even easier and more efficient PERGO also offers cleaning products specially developed for laminate floors. By following these simple cleaning tips you will enjoy your PERGO floors for many years to come.

Ordinary cleaning

Vacuum (without the beater bar) or sweep the floor using the PERGO mop to remove dirt and dust. Occasionally wipe with a damp PERGO cloth. As the Pergo surface is dirt resistance it is only necessary to use water.

Removing ordinary stains

1. Spray PERGO Floor cleaner directly on the stains/spillage's.
2. Let Floor Cleaner dissolve stains for a few minutes
3. Clean the floor with damp mop (using only water)

Your PERGO floor should not be waxed or polished. Never scrub with steel wool or any other coarse material as this may have a negative effect the appearance of the texture

Maintenance guide

Special tips for different surface

Different surface sometimes require special cleaning. Here are some simple tips for different surfaces. If your PERGO floor has any of the following surface please follow the tips below for best results.

Matt surface (ex. PERGO Naturaltouch)

In general, dirt sticks harder to floors with a matt surface. Therefore, we recommend that you clean the floor more regularly and use PERGO Floor Cleaner on the entire floor/area to dissolve dirt stuck to the surface. A greasy looking surface can occur if you have cleaned the floor in the wrong way, for example using too much detergent or the wrong detergent like soap. To remove this film , Spray ample PERGO Floor Cleaner over the whole floor and wait a few minutes for the detergent to dissolve the dirt/grease. Damp mop the floor (using only water) and dry mop afterwards. Repeat this procedure until the dirt or greasy film is removed.

Polished surface (ex. PERGO Exotic)

Dried watermarks are often more visible on polished surface. Therefore, for best results, always wipe with dry mop after damp cleaning.

Floors with bevelled edge (ex. Pergo Expression)

Floors with beveled edges are more sensitive to water since the bevel acts as a pocket where water can collect. Never wet-clean the floor. Cleaning with slightly damp mop (very well wrung mop) is possible occasionally but make sure no water is collected in the bevel. Always dry mop floor immediately.

Stain removal guide

Stain/Problem	Solution
Chocolate, Grease, Juice, Cordials, Wine	Warm water and PERGO cleaner
Tar, crayon, lipstick, shoe polish, ink, carbon, nail polish or cigarettes	Methylated spirit, acetone or household solvent, petroleum spirit
Candle wax and chewing gum	Allow them harden, then carefully scrape them off
Overall dirty floor/greasy surface	Spray ample of PERGO Floor Cleaner over the whole floor and wait a few minutes for the detergent to dissolve the dirt/grease. Damp mop the floor and dry mop afterwards. Repeat this procedure until the dirt or greasy film is removed.

Maintenance guide

Protect your floor

Although PERGO floors are very resistant to wear and scratches, use felt pads under furniture legs, and pads or plastic cups under chair legs, as an added precaution. Always use a doormat in the front entrance as well.

The floor is designed for an indoor climate between 30 and 75 % RH.

Put a doormat at the entrance
(and why not one outside as well)
This keeps the dirt off the floor.

Use felt pads under furniture legs. Use plastic or rubber wheels on castor chairs

By following these few simple cleaning and maintenance tips you can rest assured that your PERGO floor will last and look beautiful for a long long time to come.
